

# Connective Tissue Lab

Procedure:

Diagram and label the structures for the book's ideal representation of each tissue. Observe and diagram microscope observations for each specimen, label the specimen and label all identifiable features. Describe the characteristics of each tissue type.

**Loose Fibrous**- Slides: Areolar

Description of Tissue(where found):

Book Diagram

**Adipose**- Slides: Adipose

Description of Tissue(where found):

Book Diagram

**Dense Fibrous**- Slides: Scalp

Description of Tissue(where found):

Book Diagram

**Hyaline Cartilage**- Slides: Hyaline

Description of Tissue(where found):

Book Diagram

**Elastic Cartilage**- Slides: Hyaline and Elastic(bottom)

Description of Tissue(where found):

Book Diagram

**Fibrocartilage**- Slides: Fibrous

Description of Tissue(where found):

Book Diagram

**Bone**- Slide: Ground Bone

Description of Tissue(where found):

Book Diagram

**Blood**- Slide: Blood

Description of Tissue(where found):
