

Hormone Chart

Create a chart to organize important hormones of the human body. Provide their abbreviations, source, target tissue, and action. Organize like the chart below. Do not fill in information for the Action column. Instead create magnetic tabs containing the Action of each hormone.

Hormone Chart				
Hormone	Abbreviation	Source	Target	Action

Include the following hormones into your project:

- | | |
|---|---|
| <ol style="list-style-type: none"> 1. Adrenocorticotropic Hormone 2. Aldosterone 3. Androgens 4. Angiotensin II 5. Antidiuretic Hormone 6. Atrial Natriuretic Peptide 7. Calcitonin 8. Calcitriol 9. Corticosteroids 10. Epinephrine 11. Erythropoietin 12. Estrogen 13. Follicle-stimulating Hormone 14. Glucagon 15. Glucocorticoids 16. Growth Hormone 17. Inhibin 18. Inhibiting Hormones 19. Insulin 20. Leptin 21. Luteinizing Hormone 22. Melanocyte-stimulating Hormone | <ol style="list-style-type: none"> 23. Melatonin 24. Norepinephrine 25. Oxytocin 26. Parathyroid Hormone 27. Progesterone 28. Prolactin 29. Releasing Hormones 30. Renin 31. Resistin 32. Testosterone 33. Thyroid Hormones 34. Thyroid-stimulating Hormone |
