

Evolution Vocabulary

- 1 Adaptation
- 2 Allopatric speciation
- 3 Analogous structure
- 4 Biogeography
- 5 Biotic Potential
- 6 Cladogram
- 7 Coevolution
- 8 Common ancestor
- 9 Convergent evolution
- 10 Darwin, Charles
- 11 Directional selection
- 12 Disruptive selection
- 13 Divergent evolution
- 14 Embryology
- 15 Evolution
- 16 Fitness
- 17 Gene frequency
- 18 Gene pool
- 19 Genetic drift
- 20 Geographic isolation
- 21 Homologous structure
- 22 Index Fossil
- 23 Mass extinction
- 24 Mitochondrial DNA
- 25 Natural selection
- 26 Nonrandom mating
- 27 Phylogenetic tree
- 28 Reproductive isolation
- 29 Speciation
- 30 Stabilizing selection
- 31 Sympatric speciation
- 32 Transitional fossil
- 33 Vestigial organ

BASIC EVOLUTION THEORY
