

Graph **class data** results. You are graphing the bird beak type and the amount of food eaten by **each** beak. Use correct graphing format. Make a color key for each **food type**.

KEY:

Use the **Finch Lab Seed Data Graph** to answer the questions below.

1. Which finch became extinct?
2. Which beak type was most efficient at getting a variety of food? Least efficient?
3. How could you determine which type of food was the easiest to eat?
4. How might these finches avoid extinction due to competition?
