

Directions for Biology Vocabulary Folding Book Assignments

1. Using notebook paper, cut off the side margin with the holes (cut along the red line) and the top large margin.
2. Place the papers in a pile and fold in half lengthwise (hot dog style). The number of papers will vary depending on the length of the vocabulary list.
3. Staple the folding book along the folded edge.
4. Using a pencil, divide each page (front and back) into 3 equal squares.
5. Number each square, write and highlight the vocabulary word. Do not use the very last page as it will be glued into the notebook.
6. Define each word using your notes, text book, or other source. (Must be hand-written)
7. Create an **example** (see below) for each word. The example must be a diagram. (Note: a dot is not a diagram)
8. Glue this booklet on to the page next to the corresponding vocabulary list.
9. Vocabulary should be worked on at the end of each class. Do not wait until the night before it is due to start the assignment.
