

**OUT: Biotic and Abiotic Factors in Ecosystems**

1. Diagram a community web with **5 different** biotic factors attached and you in the middle.

2. Explain why you depend on these biotic factors.
3. Add 4 abiotic factors. (*Use squares.*) How do the biotic factors depend on these abiotic factors?
4. Cross out one biotic and one abiotic factor. How will the loss of these two factors affect your ecosystem?
