

Reasoning

Restate your claim

Rewrite it exactly as you did before.

Discuss your evidence

Look at your graphs and describe your data in sentence form. How did plant nutrition affect the number of years pika stayed in a certain location? How did your second variable affect the number of years pika stayed in an area?

Scientific Principle

Look at your notes and link a topic to your data on Pika. Give a scientific reason **from your notes** why Pika stayed in an area or why they did not. Do NOT write a report on pika.
