

I. What happens when molecules bond together?

A. Macromolecules form = _____ molecules which are also called _____

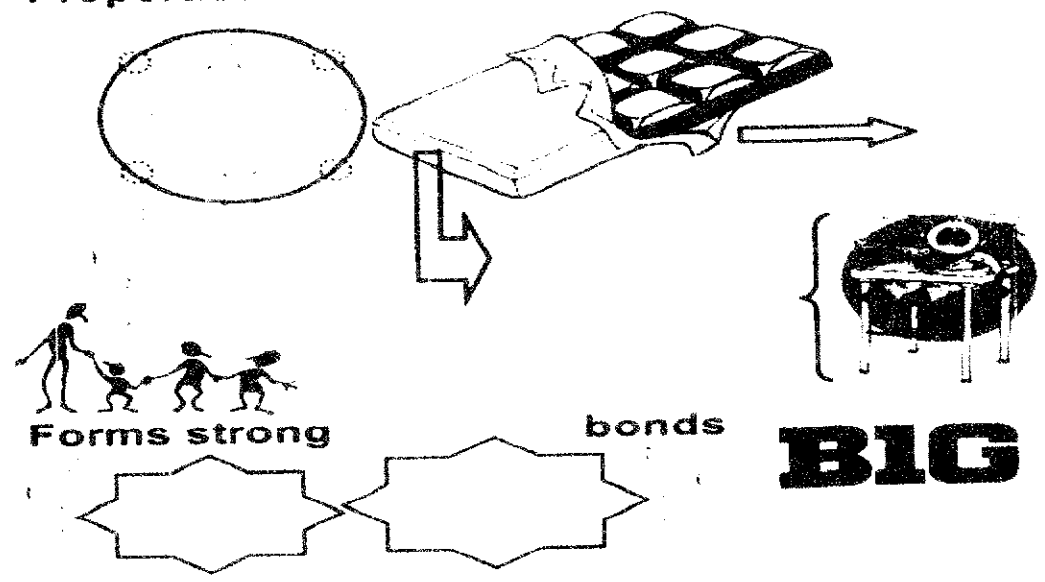

B. Polymers made up of smaller "building blocks" called _____

II. What macromolecules and compounds are important to life?

III. What core element forms organic macromolecules needed for life?

Properties of Carbon

IV. How are macromolecules formed?

> Dehydration Synthesis

- a. Forms _____ by combining monomers by "
- b. Also called "
